Arrays
Difficulty
Easy

You are given an array of numbers.

You task is to group the numbers by remainder of 3.

Example:

```
arr = {1, 2, 3, 4, 5, 6, 7}
groups:
0 -> 3, 6
1 -> 1, 4, 7
2 -> 2, 5
```

# Input

Read from the standard input

- On the single line, read the numbers of the array
  - Separated by a whitespace

## **Output**

Print on the standard output

- On the first line, print the group with remainder 0
- On the second line, print the group with remainder 1
- On the third line, print the group with remainder 2
- · On each line, the numbers in a group are separated with a single whitespace

#### Input

1 2 3 4 5 6 7

### **Output**

3 6 1 4 7 2 5

#### Input

3 3 3 3 3 Copy

#### **Output**

```
3 3 3 3 3

// empty line for group with remainder 1

// empty line for group with remainder 2
```

3дравейте,

3наете ли дали има ли проблем със втория тест във judge?

В judge ми излеза следния output:

Your output (clipped) 3 3 3 3 3 // empty line for group with remainder 1 // empty line

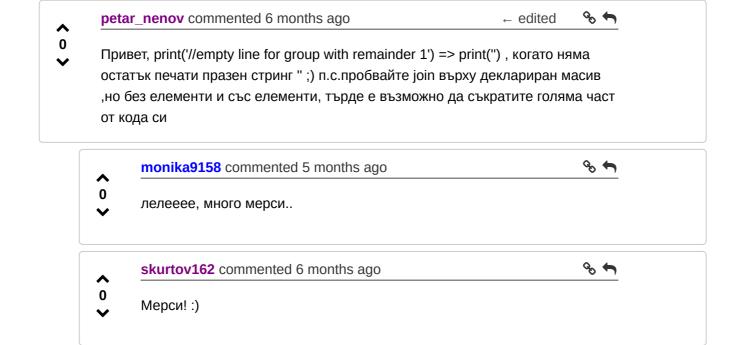

Локално, си илиза цялото изречение:

3 3 3 3 3 // empty line for group with remainder 1 // empty line for group with remainder 2

Минаха тестовете, изречението "// empty line for group with remainder 1" не е output requirement а само коментар.

Добре, локално получавам втория вход.. judge ми дава Wrong за него.. супер

& **与** 

Аз ли нещо или арей беше това с квадратните скоби?

Едит: хора, четете примера преди да се присмивате. Де. Еее.. преследва ме вече тоя коментар.
